

Inductive Synthesized Polymer Separation

- Synthesized Polymer poly(3-octyl-2,5-thienylene vinylene)(O-PTV) series
Fraction of high molecular area (target substances) and recycling separation of oligomer area.

- Instrument: LC-9130 NEXT
- Column: JAIGEL-2H+3H
- Eluent: 0.5% TEA in Chloroform
- Detector: UV-370 NEXT@ 265 nm
